FLAME RETARDANT POLYESTER FILAMENT

耐火耐熱
FIRE AND HEAT RESISTANCE

無有害物質
HAZARDOUS SUBSTANCE FREE

FRtex® 為安全無毒的聚酯阻燃纖維，以高分子改質技術將磷植入纖維中，大幅提升聚酯阻燃性能。此外，LOI>30 和自熄特性，能有效防止火焰延燒。目前已通過多種國際法規標準，同時開發出符合 NF P92-507 M1 的防熔滴阻燃絲，提供更好的居家防護。

FRtex® is a phosphonium based flame retardant filament without toxic halogen gas. The properties of flame-retarding and self extinguishing with LOI > 30 can effectively prevent flame propagation. FRtex® has passed several standards such as CNS and CAPI. The molten metal splash resistant fiber conforming to NF P92-507 M1 is also available, providing better living protection.

FRtex® Pass The Test Standard of FRtex®

End Use

發熱保溫
HEAT PRESERVATION

高回復力
HIGH RECOVERY

採用雙成份複合紡絲所製成的三維捲縮中空棉，具有輕量保溫、持久蓬鬆及彈性回復力等特性。可供應平滑手感之 silicon type 及硬澀手感之非 silicon type 棉，為羽絨衣、棉被、枕頭、床墊、坐墊、玩具的最佳填充素材。

The 3D hollow staple fiber is produced by bi-component hollow spinning technique, which has the characteristics of lightweight, superior bulkiness and elasticity. By changing the coating oil, it can be made into slippery silicone and non-silicone type to provide different hand feel. It is the best filling material for down jackets, bedding, cushions and toys.

SUN RAIN UMBRELLA

先染格紋雙面格子：將經紗與緯紗染色後，再依照顏色設計配列，織成不同花樣格紋。

提花布：透過不同組織與紋路搭配，在布面織造出各式花朵圖案，再運用不同素材做單染與異色染，使織造出的圖案更為明顯突出。

時尚印花布：平版印花、滾筒印花、反光印花、Hi-Fi 印花、紙轉印花、一片傘印花、金銀蔥印花、浮水印花、光變色印花是利用不同花版將顏色分別印在布面上，構成美麗圖案。福懋也提供數位印花服務，透過高速電腦將圖案直接印製於布面，使圖案更加細緻分明，可媲美彩色相片。

Yarn Dyed and Double-side Clothes Gingham: After dyeing the thread of weft and wraf, they are arranged according to the color design to construct different plaid textile.

Jacquard: Through the matching of weaving construction and pattern design to create a variety of different patterns. Then different materials are used for single dyeing and color dyeing to make the woven patterns more prominent.

Fashion Prints: Lithographic printing, roller printing, reflective printing, Hi-Fi printing, paper transfer printing, a piece of umbrella printing, gold and silver printing, watermark printing, photochromic printing use multiple print screens to print colors on the umbrella fabrics respectively and create beautiful patterns. FTC also provides digital textile printing by using high-speed computer to print patterns on the umbrella fabrics. The pattern is more detailed and clear, which is comparable to colorful photos.
